EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2.

Authorization for this examiner's amendment was given in a telephone interview with John R. Lastova on 1/16/2009.

The application has been amended as follows:

Please cancel claims 5-8

In Claim 1, line 3 after "charger being configured to" add the word "detect"

In Claim 10, line 11 after "to any one of claims 1-" remove "8"

In Claim 10, line 11 after "to any one of claims 1-" add "4"

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-4,9, and 10 are allowed because the prior art of record neither anticipates nor render obvious the limitations of: Claim 1: Method of charging a lead acid battery at a battery charger connectable to the terminals of a the lead acid battery to be charged, the battery charger being configured to detect a voltage over the terminals of a connected lead acid battery; and having a control circuit, for initiating a burst cycle, the method comprising the following steps of: applying a voltage at a connected lead acid battery;

detecting the voltage over the connected lead acid battery to sense an increase of voltage over said lead acid battery in order to identify whether the internal resistance of the lead acid battery has increased compared to a normal state; initiating a burst cycle if said internal resistance is identified as increased, wherein a plurality of consecutive voltage bursts are applied to a connected lead acid battery to be charged, each burst having a length of at least an order of milliseconds (mS) and each burst delivering an amount of charge to the lead acid battery and thereby successively lowering the internal resistance of the lead acid battery; and initiating a charging cycle to charge the connected lead acid battery when said burst cycle has been terminated. Claim 9: Computer readable medium comprising instructions for bringing a computer to perform a method according claim 1. Claim 10: A lead acid battery charger comprising: power supply circuitry; connectors connecting the power supply circuitry to output lines of the charger; means for connecting the output lines to the terminals of a lead acid battery to be charged measurement circuitry that detect a voltage over a connected lead acid battery and a control circuit connected to said measurement circuitry and being arranged to execute the methods according to any one of claims 1-4

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
